### New B-FormLok™ Embossments

With the launch of Verco Decking's IAPMO ER-2018 there is a new embossment pattern for Verco's B-FormLok™ embossments. The old B-FormLok™ embossments shown in section A-A Option 1 of the IAPMO ER-0217 are not compatible with the IAPMO ER-2018 and the Verco web based design tools.

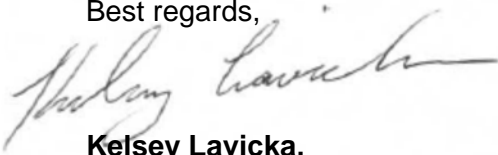

The new B-FormLok™ embossment pattern is also compatible with the values published in the IAPMO ER-0217 as shown below along with the legacy B-FormLok™ embossments.

As of January 01, 2020 Verco will no longer produce deck with the old B-deck embossments. The only exception will be ongoing project(s) designed to the IAPMO ER-0217 where Verco has already shipped deck with the old embossment pattern.

If you have any additional questions or concerns, or if you wish to discuss this further, please feel free to contact me directly.
